SURFACE PRINT
MAKERS OF FINE GRADE WALLPAPERS

Design Brief

Timeless and Current

Delve into the archives and breathe new life into timeless patterns.

Your mission, is to rewrite a classic.

Enjoy researching archival material. This maybe be pattern or illustration, photography or print, text or painting – it just needs to be old and fabulous. Let your research influence your design to become a convergence of old and new, classic and contemporary.

Explore print processes.

Surface Print have pioneered combining traditional roller print techniques with state of the art Digital machines.

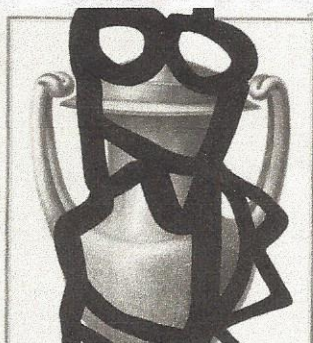

Let your creativity run wild with a full colour digitally composed masterpiece background with a big, bold traditional damask Flock laid on top or maybe a beautifully painted archival floral with a metallic Surface print texture loosely running wild through the foliage...

Elements must influence your design and not be copied directly for copyright reasons but redrawn, repainted, reinvented in your own hand.

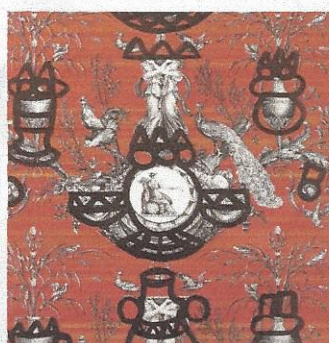

Work to a standard 52cms roll width with a maximum vertical repeat of 64cms.

There is no limit to the number of colours for digital but should you choose the mixed process route (you don't have to if you were wondering) keep the second process to single colour Surface print or Flock.

Enjoy!
